

Water Filtration Product Information

Puretec 10 x 4.5" Triple Filter Assembly with Softener Cartridge

The triple whole house filtration system is the ideal solution for areas connected to the local water supply system which have **hard water** this causes taste, stains and clogging issues in household appliances and surfaces. The triple whole house filtration system is ideal for low water usage households and comes complete with two filters and softener cartridges.

- Filter 1 – dirt removal
- Filter 2 – taste odour removal
- Filter 3 - Calcium removal

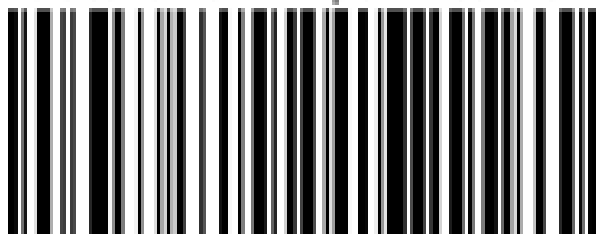

The system requires a filter and softener cartridge change approximately every six months depending on supply water quality, which is the only maintenance required for the system.

The products used are high quality Puretec products.

Price for system only is \$1550.00 including GST

This product is very well priced and significantly cheaper compared to other products being offered in the market at this time.
