

Product Information

20 x 4.5" Triple Filter Assembly with Softener Cartridge

The triple whole house filtration system is the ideal solution for areas connected to the local water system which have **hard water** this causes taste, stains and clogging issues in household appliances and surfaces. The triple whole house filtration system is ideal for low water usage households and comes complete with two filters cartridges and a softener cartridge.

- Filter 1 – sediment removal
- Filter 2 – taste odour removal
- Filter 3 – calcium removal

The system requires a filter and softener cartridge change approximately every three to six months depending on supply water quality, which is the only maintenance required for the system. This is a more economical solution to water purification for low water use households.

Price for system is \$1980.00 including GST plus install cost

This product is very well priced and significantly cheaper compared to other products being offered in the market at this time.
